locations for shipment

Drive Technology Center

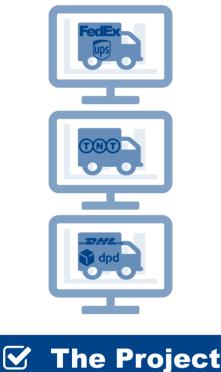

for the shipping process with different service providers on different locations

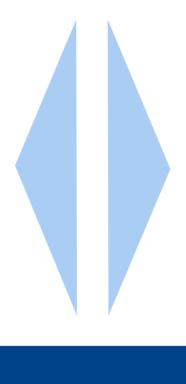

No consistent system in company

shipping with media breaks in process flows

Complex manual processes in

 Tracking information of service providers are not available in SAP

FEDEX and UPS on a starting location by SERKEM

Service Provider Integration of

· Rollout of SAP by SEW on **American locations**

 Integration of TNT in shipping processes under SAP EWM

12 weeks after project start TNT

was integrated in the shipping

processes in Brumath Connection of DPD and DHL

Bruchsal

 Interaction with the logistic service providers is carried out now completely in SAP

integrated at the headquarter in

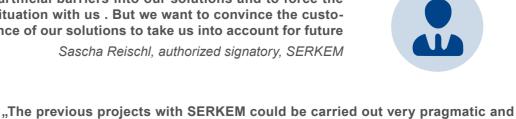

The Result

"Before the project the various CEP service providers were integrated at SEW-Eurodrive in different ways. Target of the project was to establish a standardized and rollout able solution for connecting the CEP service providers." Armin Neff, group leader IT-Services Production & Purchasing, SEW-EURODRIVE

customer into a lock-in situation with us . But we want to convince the customer with of the performance of our solutions to take us into account for future projects." Sascha Reischl, authorized signatory, SERKEM

cooperative in a short time. It is planned to roll out the flexible solution gradually in the whole SEW group, as needs arise." Erik Struppler, projekt manager IT-Services Production & Purchasing, SEW-EURODRIVE
